## On the Subject of Fast Math

Gotta go fast!

- Two letters will be displayed on the screen. Use the number pad, then the submit button to disarm the module. The module will have 3 5 stages before being disarmed.
- Press the "GO!" button to start. You have 10 seconds to
- . submit the answer. (The time can be changed in the Mod settings file.)
- If the countdown meter reaches 0, a strike will be recorded, and the module will reset.
- Once a stage is complete, the timer will restart, and two new letters will show on the display.
- Follow these rules before submitting your answer:
  - If there is a lit BOB indicator, add 20 to your total number.
  - o If there is a serial port present, add 14 to your total number.
  - If the serial number contains "F, A, S or T", subtract 5 from your total number.
  - o If there is an RJ-45 port present, add 65 to your total number.
  - If there is a stereo RCA port present and the last digit of the serial number is even, double your total number.
- If the total number is greater than 99, use the last two digits of the total number.
